Objective

Aspiring software developer with strong foundation in backend development, database design, and problem-solving. Passionate about building secure, scalable systems and exploring cybersecurity applications. Seeking an internship to gain hands-on industry experience, contribute to real-world projects, and develop expertise in both software development and security domains.

Education

BS Computer Science	<i>4th Semester (In Progress)</i>
COMSATS University Islamabad, Lahore Campus	
FSc Pre-Engineering	84%
Punjab Group of Colleges, Lahore	
Matriculation	96%
Unique School System	

Technical Skills

- **Languages:** Python (Intermediate), Java (OOP & DSA), SQL
- **Backend Frameworks:** FastAPI (RESTful APIs)
- **Frontend & Dashboards:** Streamlit, HTML5, CSS3
- **Database:** MySQL
- **Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms, REST API Design
- **Tools & IDEs:** Git/GitHub, PyCharm, IntelliJ IDEA, VS Code, Android Studio (Basic)
- **Operating Systems:** Linux Fundamentals, Windows
- **Networking:** Computer Networks (Basics)

Projects

Police Station Management System <i>Python, MySQL</i>	live demo
• Developed comprehensive MIS for managing FIRs, suspects, officers, and case tracking • Implemented authentication, CRUD operations, and role-based access control • Applied database normalization and relational design principles	
Sports Tournament Organizer (Football) <i>Java (DSA)</i>	GitHub
• Designed tournament bracket system using advanced data structures and algorithms • Implemented team registration, match scheduling, and automated score tracking • Utilized OOP principles for modular and scalable architecture	
Task Manager with Notes Application (Desktop Application) <i>Java (OOP)</i>	GitHub
• Built desktop application combining task management and note-taking functionality • Implemented GUI using Java FX with complete CRUD operations • Applied OOP design patterns including encapsulation, inheritance, and polymorphism	

Certifications

- Google Crash Course on Python
[View Certificate](#)

Key Strengths

- **Backend Development:** Proven experience building REST APIs with FastAPI and database integration
- **Problem Solving:** Strong analytical skills with practical DSA implementations
- **Database Design:** Hands-on experience with relational databases and query optimization
- **Quick Learner:** Self-taught FastAPI, Streamlit, Linux, and networking concepts
- **Team Collaboration:** Excellent communication skills with remote work readiness

Current Learning & Future Plans

- **Active Learning:** Linux system administration, Python for cybersecurity applications, Network security fundamentals
- **Career Vision:** Building expertise at the intersection of software development and cybersecurity — focusing on secure backend systems, penetration testing, and security automation
- **Goal:** Transition into cybersecurity roles (ethical hacking, security analysis, DevSecOps) while maintaining strong development skills

Additional Information

- **Languages:** English, Urdu (Native)
- **Availability:** Ready for on-site/remote internship in Lahore — can start immediately
- **Interests:** Cybersecurity, Secure Coding, Network Security, Ethical Hacking
